

**START**

Hi, we are friends of your teeth. See the guy next to us brushing himself? Well we are here to tell you that teeth don't have arms and can't REALLY brush themselves. So we have to rely on somebody on the outside of your mouth like you or an adult to take good care of us by cleaning us twice a day, flossing between us once a day, and seeing a dentist regularly. If you take good care of us we will be around a long time to take care of you.

We  
depend on  
**YOU!!!**
